150 Horizontal  
Sashless Slider

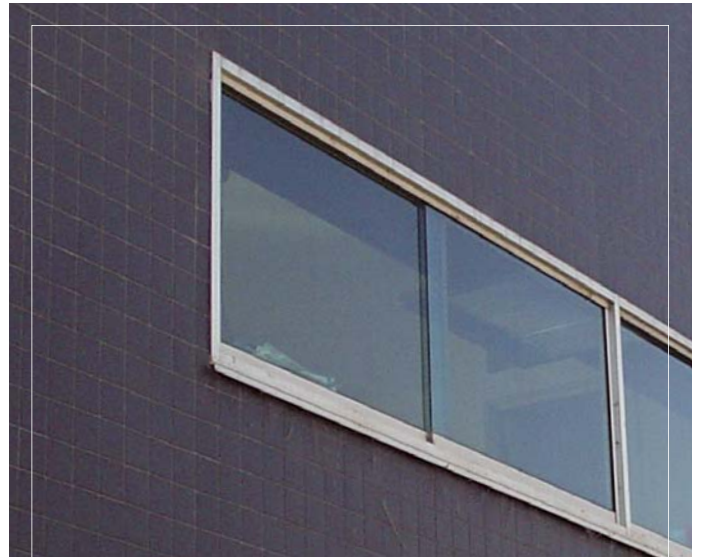

**Finally, a horizontal sliding window that will not leak.**

Developed specifically to prevent water leaks often associated with horizontal sashless windows, the Aneeta 150 Horizontal Sashless Slider delivers a seamless aesthetic and peace of mind, having been tested up to 150pa water resistance.

## 150 Horizontal Sashless Slider

Aneeta has set a new standard in horizontal windows with the introduction of its 150 Horizontal Sashless Slider.

Architects and builders can now specify or recommend a horizontal sashless window with confidence, knowing that it has been tested up to a 150pa water resistance and complies to Australian Standard 2047.

### Benefits

- Passes 150pa water rating with ease!
- Uses same keyed lock as vertical sashless double hungs
- Air infiltration figure low enough for air-conditioned buildings
- Suitable for exposed area's
- Maximum height of 1400mm
- Provides a more competitive price as you are purchasing direct from the manufacturer
- 6mm glass (float, toughened or laminated to code)
- Superior structural loading/air leakage/water penetration and operating force ratings as validated by the AS2047 test results
- Designed and manufactured by Aneeta Windows

### Typical Configurations
