

Louvre Windows

Inspire your living space with Platinum Series high performance, energy efficient windows and doors.

Louvre windows provide the greatest flow of air compared to any other window. By changing the angle of the louvre blades, natural cool breezes can flow through your home.

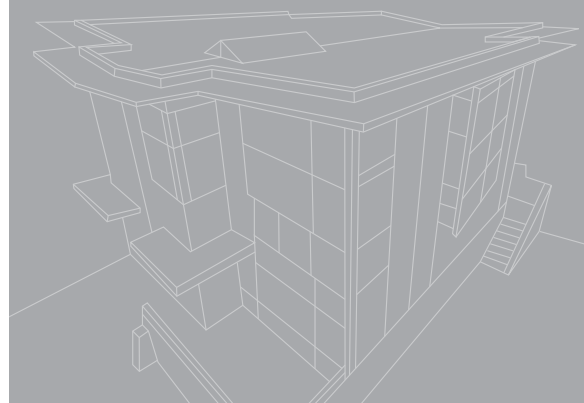

The Platinum Louvre window offers contemporary semi-commercial profiles for a clean modern appearance, which are ideal for architecturally savvy homes.

The single glazed window can accommodate glass blades of up to 6 mm thick. To cater for Australia's energy rating requirements a number of high performance glass types are available.

Uncompromising mechanisms and components, including Breezway Altair™ gallery components are used in the Platinum Louvre window for longevity as well as effortless and trouble free operation.

Maximum Product Performance

- Serviceability Wind Pressure: 2200 Pa
- Ultimate Wind Pressure: 3300 Pa
- Water Penetration Resistance: 300 Pa
- Overall Classification: N5

CAPRAL

Other features include:

- Quality Q-Lon seals and butyl impregnated linen gaskets at the frame joints which help prevent water and air leakage. Such components mean that when the louvre window is closed, it is tight and secure.
- The ability to choose from a range of blade options including glass, timber and anodised or powder coat aluminium. These are available in either 102 mm or 152 mm in height. The louvre galleries are also available in a wide range of colours.
- Flyscreens or security screens (including Amplimesh® and ClearGuard®) can be seamlessly incorporated within the frame. Choose from internally mounted flyscreens (unique to the Platinum Series Louvre windows) or the standard externally mounted option. A security bar is also available.
- Achieve design consistency by combining the Platinum Louvre window with other Platinum Series Products. This is a simple yet effective way of maintaining the value of your home.

HIGH PERFORMANCE LOUVRE WINDOWS

Easy to use handles.

Smooth modern frame design.

The seals at the corner joints are hidden.

We can colour match the louvre galleries.
